

> Versioning Guide

Garnett Dickinson uses Agfa Apogee PrintDrive to produce multiple versions of a product by changing minimum plates. (for example a black plate change for different prices etc). This Workflow combines each version with the master and works best if files are supplied in the following manner: one master PDF, which contains all the common elements, such as pictures, logos, etc... and one PDF per version change, which only contains the changed elements...

For Example; to produce this...
